

**DEVELOPMENT AND UTILIZATION
OF
SUBSURFACE SPACE IN URBAN AREA**

—TUNNEL SYMPOSIUM—

march, 1990

SPONSOR: JAPAN TUNNELLING ASSOCIATION

PATRONAGE: MINISTRY OF TRANSPORT

MINISTRY OF CONSTRUCTION

CONTENTS

■ Session I (LARGE PROJECTS OF SUBSURFACE SPACE USE IN JAPAN)

- Design of Shield Tunnel in Trans-Tokyo Bay Highway Yujirou WASA 1
Manager, Design Section No. 1, Design Department. Trans-Tokyo Bay Highway Corporation
- Plan for Central Loop Highway (Shinjuku Route) Hiroshi TAKAHASHI ... 33
Second Planning Section, Planning Department Tokyo Expressway Public Corporation
- Tokyo Municipal Subway No. 12 Line Masatoshi MATSUMOTO 45
Assistant to Director General Rapid Transit Railway Construction Headquarters
Transportation Bureau, Tokyo Metropolitan Government
- Subway Line No. 7 in Tokyo Joji KONISHI 61
Sub-Director, Planning Department New-Line Construction Bureau, Teito Rapid Transit Authority
- Design-execution of Keiyo Metropolitan Line Makoto MAEDA, * Takaya KAINO 71
The Construction work No. 3 Department manager, the Tokyo Branch of Japan Railway
Construction Corporation
* The Construction Control Section Chief of Tokyo Construction Office, East Japan Railway
Company
- Construction Plan for the KATAFUKU connecting Line Toshishige KISHIO 95
Kansai Rapid Railway Co., the head of the Construction
- Underground - River Beneath Loop Road Minoru NUMAJIRI 117
Director, Reconstruction Section, River Division of Construction, Tokyo Metropolitan
Government
- Intensive Treatment of Sewerage Sludge at Coastal Plant Yasushi UEHARA ... 147
Manager of No. 2 Construction Section, No. 5 Construction Office,
Sewerage Bureau, Tokyo Metropolitan Government

■ Session II (TECHNICAL PROBLEMS ON SUBSURFACE SPACE USE)

- Application of Conventional Method to Urban Tunnels Toshihisa ADACHI Dr. Eng. 169
Professor, Dept. of Transportation Eng., Kyoto University
- Necessity and Some Problems of Deep Underground Railway Yoshiji MATSUMOTO Dr. Eng. 177
Professor, Dept. of Civil Engineering, Science University of Tokyo
- Consideration on Site Investigation for the Deep Underground Tunnel Tatsutoshi KONDOH ... 193
Oyo Corporation Chief Engineer
- Underground Space Use in Urban Areas-Present Situation and Future Subjects- 207
Research Coordinator Toshinori MIZUTANI
for Underground Development, Public Works Research Institute, Ministry of Construction
- Some points on the Design-execution of the Greater-Depth Subway Hiroyuki KAWATA ... 221
Chief research engineer, Geotechnical Engineering & Natural Disaster Prevention Laboratory,
Railway Technical Research Institute

■ Session III (TUNNELLING UNDER DEEP EARTH-COVER)

- Automatic Alignment Control System for Tunnel Excavation Yutaka OHNISHI 247
Civil Engineering Division, Sato Kogyo Co., Ltd.
- Automatization and Robotization in Shield Tunnelling Works Hideki HAGIWARA 255
Dupty General Manager of Technology Department Civil Engineering Division Shimizu Corporation
- Automatic Direction Control System(Provided With Control System of Segment Alignment)
for Shield Machine Akira NISHI 265
Chief Engineer, Mechanical and Electrical Department, Tokyo Branch, Tobishima Corporation
- Fuzzy Reasoning Applied for Shield Direction Control Yoshitaka KUWABARA 281
Manager, Machinery & Engineering Section Machinery & Engineering Department Nishimatsu
Construction Co., Ltd.
- Integrated Shield Driving Automatic Control System Hiroshi NAGURA 289
Engineering & Design Division, Civil Engineering Headquarters, Hazama-Gumi, Ltd.

Shield Seal Measures Under High-Water Pressure	Fumitaka KUMAI	299
	General Manager, ECL Engineering Division, Tekken Construction Co., Ltd.	
ECL Method for High Water-Pressure Conditions	Hiramasa AOKAGE	313
	Manager, Structural Engineering Section, Dept. of Civil Engineering Technical Reseach Institute, Fujita Corporation	

■ Session IV (CONSTRUCTION OF DEEP INCLINED / VERTICAL SHAFTS)

Construction of Deep Shafts in Soft Ground	Kozaburo TSUCHIYA	321
	Associate Manager, Tech. Dept., Ohbayashi Corporation	
The Deepest Structural Slurry-Wall (99m in Depth) for a Circular Shaft of Sewerage Shield Tunnel in Japan	Kazuo SUZUKI	329
	Senior Engineer, Civil Engineering Design Division, Kajima Corporation	
Deep Shafts by Slurry Wall Method	Yasuharu KAYAMA	341
	Senior Research Engineer, Constructinn Engineering Section, Technical Research Institute, Maeda corporation	
Underpinning for Massive Structure (Keiyo Line Underground Station)	Ippei SAITO	355
	Assistant Manager, Okumura Corporation	
Underpinning of Railway Shield Tunnels for the Construction of Underground Structure	Satoshi TERAMOTO	369
	Assistant Manager, Underground Space Development Section, Technology Development, Taisei Corporation	
Tunnelling System of an Inclined Shaft for Utilizing the Underground Space ..Hideo HIRASAWA		381
	General Manager, Civil Engineering Dept., Civil Engineering Division, Kumagai Gumi Co., Ltd.	
Preservation of the Groundwater Environment by the Recharge for the Construction of Underground Space	Akira MORISHIMA	393
	Office of Construction, Takenaka Civil Engineering & Construction Co., Ltd.	
SSS-MAN Method (Super Soil Stabilization Management)	Masato HONDA	401
	Assistant General Manager, Civil Engineering Division, Mitsui Construction Co., Ltd.	

■ Session V (REPORTS BY ITA E. C. MEMBERS)

The Channel Tunnel-View of a Tered	A. M. Muir Wood	413
	Honorary President of ITA, Honorary Member of JTA	
Integrated Design Method for Shallow Tunnels in Soft Ground	Z. Eisenstein	
	1er Vice-President of ITA	
Use of the Underground in Norway	E. Broch	429
	Immediate Past President of ITA	
Search of Excellence for the Use of the Underground Space in Belgium	V. Roisin	441
	Past Vice-President of ITA	
Metro Tunnelling in China	Gao Quqing	457
	Executive Council Member of ITA	
Present State of Underground Crude Oil Storage Technology in Japan	Shinji Kiyoyama	475
	Executive Council Member of ITA
